Car Number Request

Every registered car at CMP must have a unique number for the division that they are competing in. The use of letters to differentiate car numbers and 3-digit numbers will be allowed due to the use of transponders. For example if someone already has the number 15, other competitors will be permitted to register as 15X, or 15NH. If two competitors want the same number, we will refer to last year's points for that division to determine who has the right to this number. All teams have until April 13, 2019 to register their cars. Failure to register by this deadline will relinquish your rights to that number.
